A WELCOME FROM NOBLEMAN PRODUCTIONS

Hollywood-grade *production.*

We make three kinds of video, for people who can't afford
for it to go wrong.

VETERAN OWNED AND OPERATED · SAN DIEGO · LAS VEGAS

Welcome *aboard*.

Thank you for considering Nobleman Productions. We're a veteran-owned video team based in San Diego and Las Vegas, and we make three kinds of video: YouTube channels that build authority, live broadcasts for course creators, and conference and event coverage.

We started the company because we kept seeing the same gap. Beautiful video alone doesn't grow an audience or book new clients. Strategy does. So we bring both to every project.

This short guide covers what we make, who's behind the camera, and how a project runs from the first call to the finished film. When you're ready, the last page shows how to start.

— THE FOUNDERS

Jean Gotay & Justin Edelman

FOUNDERS, NOBLEMAN PRODUCTIONS

Veteran owned

and operated. Discipline and execution built in service.

San Diego · Las Vegas

Our home markets. We travel anywhere in the U.S. for the right project.

One crew

across all three services, led by a former Apple video engineer, with Hollywood and Emmy-recognized camera operators.

Three service lines. *One standard.*

For people whose reputation is on the screen: coaches and advisors building authority on YouTube, course creators running premium launches, and event teams who won't let the video be a side note.

YOUTUBE CHANNEL RETAINERS

Grow a channel that actually books clients.

"The video you never post gets zero views. Every single time."

So we film several episodes per shoot day, then edit, title, and publish them on a schedule.

- Monthly shoot days in San Diego or Las Vegas
- Editing, thumbnails, and titles for every episode
- Search optimization and a publishing calendar
- Short clips for Instagram, TikTok, and LinkedIn
- A monthly analytics review and next month's plan

53 → 8,000 subscribers in six months, for a retainer client

LIVE PRODUCTION

Your program is premium. Your production should match.

"Anything that can go wrong on a livestream will, in front of everyone."

So we build in backups and fallback plans before show day, and record a backup of the audio.

- Several camera angles mixed live, with branded graphics
- Broadcast-quality audio, with a backup recording
- Streaming to YouTube, Vimeo, or your platform
- A technical director running the show
- A polished replay and a package of short clips

Broadcasts to 50,000+ concurrent viewers

CONFERENCE & EVENT VIDEO

Hollywood and Emmy talent — at your event.

"The CEO will say the best line exactly once."

So we plan the shots in advance and cover the room with several cameras.

- Multi-camera coverage of keynotes and breakouts
- An interview set for executives and speakers
- A polished recap film for next year's marketing
- Live streaming with branded overlays
- Drone coverage (FAA Part 107) where the venue permits

Same-day highlight reels, when planned into the shoot

ALSO ON REQUEST

Short social clips · Executive interviews · Event photography · Documentaries · Drone (FAA Part 107)

THE CREW

The people behind the camera have done this at the *highest level*.

A former Apple video engineer leads the crew. Camera operators carry Hollywood and Emmy credits. Our drone pilot is FAA Part 107 certified. It shows in the footage, and it shows in how calm a shoot day feels.

50,000+

concurrent viewers on a live broadcast

53 → 8,000

YouTube subscribers in six months, for a retainer client

Same day

social clips from an event, when planned into the shoot

CREDENTIALS

The receipts.

01 Former Apple video engineer

Years inside the world's most demanding video team.

02 Hollywood specialty camera

Specialty camera work on major Hollywood productions.
